2. Self-Reflection and Confidance Level
   - Part that I am confident about:
     Based on the tutorial sessions we have covered, I feel highly confident about the topics in Session 1 (Formal and Informal Language) and Session 2 (Things in the Office and Descriptive Paragraphs). Differentiating between formal and informal structures such as avoiding contractions, slangs, or clichés in professional business writing is very clear to me. I also find it pratical to describe an office workspace using proper adjectives and prepositions of place.

   - Part that I am not confident about:
     On the other hand, I feel less confident about Session 7 regarding Negotiation Skills (especially Handling Conflicts and Refusing Offers politely). It can be quite challenging to recall anf apply the specific formal phrases spontaneously when a deal cannot be easily reached or when we need to maintain a positive standing despite a disagreement.

   - Question related to the learning materials:
     I have a question regarding Session 7 (Negotiation): If we reach a complete deadlock or cannot settle our differeces in a business meeting, what is the most recommended closing phrese to end the session politely while still maintaining a good long term professional relationship with the client?
